

Two More Rooms To Be Added To Bassano School

More Classrooms Will Relieve the Crowded Conditions in Bassano To Be Ready September 1

Two more classrooms are to be added to the Bassano school this summer. The addition will be of brick construction, two stories high, and will be built on the northwest corner of the present school building. The school board had it necessary to enlarge the school because of the present crowded condition which has existed for some time. One classroom has been located in the basement for a number of years, and some of the rooms are too crowded for the teachers to do their best work and for the pupils to obtain the best results. The additional two rooms will provide ample accommodation for all the pupils and dispense with the classroom in the basement.

The new addition will cost approximately \$5,000. The plans have been approved by the Board of Public Utility Commissioners in Edmonton, and tenders will soon be called for the construction work. The cost will be financed by money in the school tax trust fund. It will not be necessary to increase the tax to pay for the outlay. There may, however, be an advance in the school mill rate if there is an appreciable increase in the cost of school operation.

At present there are about 210 pupils attending the Bassano school. There has been a gradual increase in the school population for the past few years leading up to the crowded condition of today.

Much Uncertainty Over Election In Bow Valley

U. P. A. Will Have Candidate in Bow Valley

The provincial election date is announced for June 19, and interest in politics is already beginning to warm up in Bow Valley. When the electors of this constituency go to the polls it will probably be to choose a representative who is a newcomer in the political ring. With the withdrawal of Jos. T. Shaw, Liberal M. L. A., and the departure of E. F. Purcell, Conservative candidate in the last election, both these parties will require a new leader in the coming election. And in the U. P. A. it is rumored that the favorite choice, Ben S. Plummer, will not accept nomination, so a brand new candidate is expected to lead the farmers in the campaign battle.

Neither the Liberals nor the Conservatives have publicly announced a leader for their party, and whether either or both of them will even contest the Bow Valley seat has not been made known. That the U. P. A. will place a candidate in the field there is no doubt. Farmers active in U. P. A. affairs have stated as much, and their candidate is to be chosen at their convention to be held in Bassano about the middle of May. The two names most frequently mentioned as possible U. P. A. candidates are those of W. R. Scholting, of Hussar, and J. M. Wheatley, of Chancellor.

The boundaries of Bow Valley constituency have been slightly altered. On the north end the Wayne district has been cut off and taken into the newly formed Drumheller constituency, and on the southwest a small area has been annexed to a neighboring constituency. The new legislative body will have 43 seats, including the five new ones of Edmonton, Calgary, Clover Bar, New Peace River, and Drumheller. The Okotoks and High River Constituencies have also been merged and the Nanton and Clarno constituencies have also been merged.

RAIN CAUSES BAD ROADS

The frequent rains of the past week have made the roads difficult for motor traffic in some spots that are not very well drained.

On the main highway in the vicinity of Countess there are a couple of bad spots where a number of motorists came to grief.

Today, Thursday, the warm sunshine dried out the roads considerably, and with dragging they can be put in fairly good shape.

Hussar News

HUSSAR, April 30.—The Ladies Aid will meet at the home of Mrs. Roy Hulen on June 19. Business meeting in kitchen May 10.

Mr. and Mrs. W. D. Moffat motored to Calgary on Saturday.

Mr. and Mrs. C. T. Armstrong went to Calgary on Wednesday, returning on Thursday.

The Misses Madge and Elsie Keddie, who spent the holidays with their uncle at High River, returned on Sunday.

Miss Irene Walters, who spent the Easter holidays with Mrs. J. M. Walters, returned Sunday to continue her work at the Calgary normal.

Bruce Ball and Martin King motored to Drumheller on Friday. They returned on Sunday.

Miss Fletcher and Miss Robinson returned on Sunday from attendance at the teachers convention in Calgary.

P. C. C. Farley motored to Camrose on Saturday, and Mrs. Farley returned with him on Sunday.

The younger set had a very enjoyable dance on Saturday evening. Miss Given Stiles was over from Hussar for a few days visit with Mr. and Mrs. E. N. Stiles.

Miss McLean returned on Sunday.

Miss Hendry spent some of Easter week in Cochrane visiting relatives.

Jerry Keener motored to Strathmore on Sunday.

R. O. Swan motored to High River on Sunday.

Miss Emma Montgomery spent Sunday with her parents, Mr. and Mrs. T. L. Montgomery.

A. M. Mahoney motored to Calgary on Sunday.

W. I. Meeting The monthly meeting of the Hussar W. I. took place at the home of Mrs. A. Jensen, with fifteen members and visitors present. Arrangements were made for the child clinic to be held in June, and a paper, "The Future of Agriculture in Britain," by Mrs. Bell. A guessing contest answered by the names of garden vegetables was enjoyed during the lunch period. Mrs. Kuchie was the fortunate lady.

New Rancher Says He Likes Sunny Alberta

Pleased With Country and Tells of Plans for His New Ranch

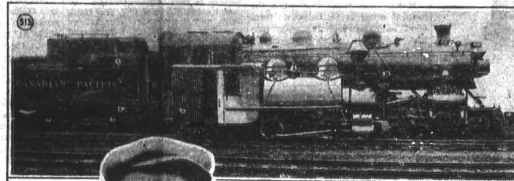

N. H. Neilson, the English rancher who has moved to north of Gem Colony, is pleased with his sunny Alberta and likes the friendly neighborly spirit of the people of the west. He arrived from England early last month, and for the past few weeks has been busy with the work of getting his sheep and cattle ranching business under way.

Mr. Neilson leased 5,000 acres of prime land from the C. P. R. for a ten year period. The land is located north of Gem Colony, some of it bordering on the Red Deer river, and includes many square miles of splendid pasture. John Walters, former manager of the White Farm, is manager of the Neilson ranch.

A number of buildings have been erected on the new ranch, and there are already about eight hundred head of sheep running on the Neilson property. The owner plans to go into the cattle business later. He intends to fence his holdings, and plans to put up about 45 miles of fence.

Mr. Neilson operated a ranch in Argentina for a number of years, and has been successful in that country. He is going to transfer them to Alberta. In addition to his ranch north of Gem he will also operate another ranch in the foothills south-west of Calgary.

THE GIANT AND THE DWARF

Overshadowed by the tone of steel making up the monster that has succeeded it, "Curly," (tiny, left-funnelled wood-burner of pioneer days, can claim a record seldom approached anywhere in the world for long life, usefulness and endurance.

"Curly" was brought to British Columbia in 1871 and W. H. (Bill) Evans (inset), engineer of the first Canadian Pacific passenger train to reach Port Moody in 1885, says it was built in a San Francisco machine shop and later sided Connel to assist in the Panama Canal region, not to mention construction work in Peru. Sixty years of arduous work left their mark on "Curly," but now the engine after a thorough refitting at the Canadian Pacific Vancouver yard is to be exhibited at the Vancouver Exhibition in August, as a museum piece of the early days.

Bill Evans was called out of retirement for purposes of this picture and gladly donned the old overalls again to show himself once more in harness alongside "Curly."

Telling The Truth Makes Trouble For Young Man

"Social Lies" Necessary If We Would Keep Our Friends

What would happen if you told the truth and nothing but the truth if you never even told one of those little white "social lies" to please a friend who had bought a new hat or called when you were too busy to talk to anyone?

Robert Bennett tried it for twenty-four hours to win a bet. It proved to be the most nerve wracking experience in the young man's life, and it is doubtful if Bennett will ever tell the truth again.

All this happens in "Nothing But The Truth," a three act comedy which the Bassano Players will present in the Masonic Community Hall Friday evening next week, May 9.

A number of the players took part in the production of "Are You a Mason?" last year. They have been rehearsing the new play for weeks under the direction of Jas. Johnston, and the play is now almost ready for a public performance. The amateur company could give a very creditable performance right now, but Mr. Johnston is not satisfied with something that is just pretty good; he desires to give the public the very best, and with this end in view the players are spending another week in developing these little imitations of roles and subtle gestures which denote the difference between mere play acting and real histrionic art.

The story is that of a young man, who, to win favor in the eyes of the girl he loves, makes a bet that he can tell the truth and nothing but the truth for twenty-four hours. He thought it would be easy, but he soon discovers that it is the most difficult job he ever tackled. His efforts to try and win the bet by telling nothing but the truth get him into all kinds of trouble, and the more complicated and embarrassing situations which arise provide hundreds of laughs for the audience. There will be a dance held after the show.

New And Larger Greens Improve The Golf Course

Course Is Much Longer and More Difficult

Alterations now being made on the Bassano will greatly improve it and should tend to make the game more popular.

All the greens are being made about four feet larger in diameter, and new greens are being made for Nos. 2, 4, and 6. The greens are all being surfaced with oiled sand, and the work should be completed some time this week.

The changes will make the course much longer and more difficult, and will take good golf to get around under forty strokes.

Gem News

GEM, April 30.—Mrs. E. C. Small and children left on Sunday last for England where they plan to have an extended holiday visiting relatives and friends.

Miss Lavella Pollock and brother Willie left for Calgary on Sunday last.

Winter Roper returned to Lethbridge after spending Easter holidays with his parents in Gem.

Mr. and Mrs. Ralph Holson and family were Sunday afternoon callers on Mr. and Mrs. S. Seifried.

Mr. and Mrs. Moffat with Miss Moffat, of Rocky Mountain House, were spending a few days with Mr. and Mrs. W. Peake.

Miss Mildred Ferguson returned to her home in Countess Sunday last, after spending a week with Mrs. G. Little in Gem.

A large number attended the Gem local U. P. A. ice cream social on Saturday, April 26. Mr. Bryant, Wheat Pool delegate, gave his report on the delegates annual convention.

Wm. Pettigrew, field service man, spoke on various pool topics, and his address was listened to most attentively by all present. At the close of the speeches, the ladies served ice cream, cake, and coffee. Reports indicate that much benefit was derived from the meeting.

Another carload of lamp oil is expected to arrive in the Colony soon.

Rosemary News

ROSEMARY, May 1.—Little Walter Shihall was thrown from a horse while playing at J. L. Young's, and had the misfortune to sustain a broken wrist.

The infant son of Mr. and Mrs. C. Krause died of pneumonia Friday morning. The funeral took place Sunday.

Mr. and Mrs. P. A. Gellings are preparing the company Sunday of Mr. and Mrs. Regier and Mr. and Mrs. Carl Ritz.

The teachers are again on duty after their Easter holidays.

Miss Dorothy Adams spent the Easter holidays with her friend Miss Agatha Gellings.

Mr. and Mrs. J. McNeil entertained a number of friends on Wednesday. The evening was spent in playing whist.

James Adams was taken to the Bassano Hospital Sunday suffering from influenza on his right lung. The following day it became necessary to tap the lung.

The Rosemary Ladies Social Club met April 28 at the home of Mrs. Starkey with fourteen members present. The roll call was answered by a household hint from each member. It was decided by a unanimous vote to donate five dollars to the Junior Red Cross Society. The social hour consisted of talks on health, nursing, etc., which was very instructive and interesting to all. A delicious lunch was served by the hostess assisted by her daughter, Miss Dolly. The next meeting will be with Mrs. Regier. Everyone bring your fancy work.

Bassano Plane Will Fly In The Calgary Air Show

Local Air Men Are Rushing Repairs on Plane to Have It Ready by May 17th

Bassano will be represented in the airplane show and demonstration to be held in Calgary on Saturday, May 17. The Scott-Sambrook plane will be the Bassano's contribution to the air fête, and the ship will probably be put through her paces by Jack Palmer, ace of the Great West Air Force, Calgary, or if Mr. Palmer is not at the controls, by another of the Great West pilots.

The local plane, owned and built by Dr. A. G. Scott and W. E. Sam Brooke, is now undergoing repairs. The ship was damaged in a fiery crash when it fell a few miles from Bassano on a day when flying conditions were very treacherous. Bill Hamm was one of the pilots who was in the machine at the time of the accident. The ship fell from a height of about eighteen hundred feet. The men were injured, but the left wing of the plane and the tail assembly were damaged.

The two local air men have been busy during the past few weeks making repairs on the plane, and they expect to have it ready for the races in Calgary on May 17. A new wing, being built and is now next completion. Minor alterations have been made in the rudder and elevator so as to make the ship less sensitive to the controls and more easily handled at high flying speed. Some improvement has also been made in the landing gear. The plane is being given a thorough overhauling to put it in its best class shape.

The Scott-Sambrook plane should make good showing at the air fête in Calgary. The ship, a monoplane with a seating capacity of three, develops phenomenal speed for a plane of its size and power, and possesses exceptional climbing and maneuvering powers.

Countess

COUNTRESS, May 1.—Mrs. Dutton, of Arrowwood, has been spending a week here with Mr. Dutton.

Mr. and Mrs. McKenna and child left on Sunday by motor for Spring Centre where they will make their home.

Orville Cartley, of Bassano, spent the week-end visiting with Mr. and Mrs. A. M. Anderson.

The Busy Bee Sewing Club met at the home of Mrs. M. H. Giamble on Saturday.

Mrs. M. H. Giamble and Miss Marie Chamberlain were visiting relatives and friends in Gem Saturday.

Mrs. J. Newman and Mrs. Sluss spent Wednesday afternoon visiting with Mrs. M. Ferguson.

The farmers are kept quite busy pulling cars out of the mud along the main highway near Countess.

1930 Wheat Crop Growing Under Ideal Conditions

More Rains Provide Ample Moisture — Heavy Precipitation Recorded In April

Rain soaked wheat fields are today basking under the warm May sunshine, and the new wheat crop is growing under conditions that are ideal. The rains of the past week brought an additional supply of moisture, and the soil is now soaked to a depth of many inches. There is enough moisture in the ground to give the crop a wonderful start, and to carry it far into the month of May.

When seeding was started early in April the soil contained only a small supply of moisture, but the April rains brought an abundant supply of rain that brought cheer to the farmer who is now in a jubilant mood.

April proved to be a rainy month, an inch and a half of precipitation falling at Bassano, and an even larger amount falling at Gem and Countess. The figures which the C.P.R. D.N.R. rain gauges are as follows:

| Total Rainfall for April | | |
|---|-----------|-----------|
| Bassano | 1.48 inch | |
| Bassano Dam | 1.48 inch | |
| Gem | 1.46 inch | |
| Countess | 1.70 inch | |
| Rain fell on Sunday, Tuesday, and Wednesday of this week the heaviest precipitation occurring on Sunday. The rain gauge readings for these three days are as follows: | | |
| | 27th | 29th 30th |
| Bassano | 48 | 36 15 |
| Bassano Dam | 44 | 35 16 |
| Gem | 80 | 92 13 |
| Countess | 60 | 10 17 |

Wheat seeding is finished on summer fallow and breaking in the immediate vicinity. With such a plentiful supply of moisture in the ground some farmers are planning to stubble in a small acreage. This will further increase the wheat area, which is already about 20 per cent greater than that of last year.

Wheat is showing four or five inches above the ground on fields that were sown early, and the later sown fields are coming along splendidly. It is looking fairly good, although a little thin where germination was poor last fall.

The rains have delayed seeding operations at Latham, Countess, Gem, Crossfoot, Makepeace, and Hussar. In these districts about half the seeding is completed.

First Government Crop Report

Telegraphic reports received by the Department of Agriculture indicate that in the southern part of the province from 40 to 75 per cent of what is sown. Over all of the southern area moisture is sufficient for germination and over a large part is abundant. In the central sections of the province, reports indicate seeding of wheat to be from 35 to 75 per cent completed with sufficient moisture for germination but no reserve. Most of this area has received some moisture during the month of April and on April 24 and 25 snow and rain fell over a large area of the eastern part of the province.

In the Peace River district heavy rains north and south of Peace on April 24 have delayed seeding for several days. Very little grain has been sown north of the Peace, while to the south more than half the area has been seeded. It is estimated that there is an increased crop area in this district of 25 per cent, and that moisture conditions are the best in twenty years.

There is not likely to be much decrease in the acreage sown to wheat throughout the province, but the area, however, an increase in the acreage of coarse grains making a considerable increase in the total acreage sown. The small acreage of winter wheat sown has suffered severely from winter killing.

Livestock is reported to have come through the winter in fair condition.

TREES BUDDING OUT

The trees in Bassano are budding out nicely, and under the influence of the rain and warm sunshine they will soon be out in leaf.

Government To Complete Legislation On Resources Before Considering Budget

Ottawa, Ont.—Legislation dealing with the return of the natural resources to the western provinces will be dealt with by parliament before the budget is brought down.

This was stated by Premier Macdonald King at the conclusion of a cabinet meeting. The prime minister said that it had been hoped to dispose of this legislation which has for its object return of the natural resources to Manitoba, Saskatchewan and Alberta, as well as the lands in the Peace River block and railway belt to British Columbia, before the Easter recess.

The House of Commons had not been able to pass through the legislation, so it would be gone on with when parliament resumed, before the introduction of the budget.

The date when the budget will come down depends to a certain extent, on the progress which is made with this legislation. The prime minister made no announcement as to when the statement of the finance minister may be expected.

While Mr. King gave no indication to this effect, it is assumed that the importance of the natural resources legislation has prompted the government to try and get it through before the budget comes down.

Once the budget is introduced in the House, debate on it will be practically continuous, possibly for some weeks.

There is also the possibility of the budget debate becoming so strenuous that dissolution of parliament might be precipitated. In that event the natural resources legislation would fall by the wayside, and it is probable that it has been done might be little avail.

Two Vancouver Teachers Drowned

One Sacrificed Life In Attempt To Rescue Friend

North Vancouver, B.C.—J. A. Lethman, Vancouver, and F. E. Lethman, Vancouver, teachers in Carlton school, Vancouver, perished in Lynn Creek before the eyes of 18 girl pupils they had taken for a mountain hike.

Mr. Lethman sacrificed his life in a valiant attempt to save his friend. The party had reached Second Canyon and Mr. Lethman safely crossed the large log that serves as a bridge, when Mr. Hyndman lost his balance halfway across and fell into the boiling current.

Without hesitation Mr. Lethman plunged into the swollen creek, but failed to reach his friend, before he was swept over the falls and perished.

Ship Enters Wrong Port

Orders Mixed and Seattle Cargo Goes To Vancouver

Vancouver, B.C.—One often hears of persons getting into wrong hotel rooms, but seldom hears of a vessel getting into a wrong port. The oil tanker "Lee Anson," bound from San Pedro to Seattle, arrived here and asked the local agent for orders. The master of the vessel soon found out, however, that somebody had blundered and his cargo was bound for Seattle, not Vancouver. He and his vessel got out of port on the same tide.

The agents are trying to find out why blundered. "A bad half-hour" is promised for someone.

Japanese Royalty Starts Tour

Yokohama, Japan.—Japan's Imperial newswires, Prince and Princess Takamasa, sailed from this port, aboard the "Kashima Maru," for Europe, on a homeward-bound tour after a year, and will encircle the globe. They will visit most of the courts of Europe and will spend ten days in Canada, probably before sailing for home, from some Pacific port, around May 1, 1931.

Looking For Honors

Geneva, Venezuela representative at the League of Nations headquarters here asked that the country should have next turn in supplying the president of the league. His request was referred for decision to the next session of the league council.

Starts New Air Service

New York, N.Y.—Still making new air trails, Col. Charles A. Lindbergh has inaugurated the new trans-Canada Airways by making a dawn-to-dusk flight from Havana to Cristobal, Canal Zone.

W. N. U. 1835

C.N.R. To Be Reconstructed

Endorsement Of Amalgamation Of All Companies Is Expected

Ottawa, Ont.—The reconstruction of the financial structure of the Canadian National Railway will be started from this session of parliament with the passage of a bill to amalgamate into one corporation all the various companies which now make up the C.N.R. Intimation to this effect came from the Department of Railways and Canals. It is not expected, however, that the further steps of consolidating the various bond issues and otherwise reorganizing the whole financial structure will be proceeded with this year.

The bill to consolidate the companies, it is believed, will not be contentious and will go through with little discussion; but to deal with the financial structure would take a great deal of time, even if the preparations were far enough advanced, which includes consent of the various bond-holders. If there is to be a general election this year, legislation taking up so much time would likely find the going difficult.

French Flier Honored

Notable Figures In Aviation Attend Funeral In New York

New York, N.Y.—Representatives of the French Government and notable figures in the field of aviation, including Col. Charles A. Lindbergh, paid their last respects to Count Henri de la Vaulx, president of the Federation Aeronautique Internationale, who was killed in an accident near Jersey City, N.J., at the end of a flight as part of the escort to Col. Charles A. Lindbergh who flew to the Canadian capital to take part in the celebration of the Diamond Jubilee of Confederation.

Johnston passed away at Woodbridge, Ontario, on the morning of May 1, 1927, as he was about to take flight in his machine, but he was too close to the ground and his parachute failed to open.

Australia Wants Native Viceroy

Chief Justice Of High Court Has Been Recommended For Office

London, Eng.—The old and much disputed question of whether the British dominions should have governors-general of their own nationality is likely to be settled, once and for all by Australia's demand that the successor to Lord Stonehaven should be an Australian.

Sir Isaac A. Isaacs, chief justice of the Australian high court, has been recommended as the Commonwealth's next governor-general, and although the dominions office here is in the French church of St. Vincent de Paul, there the body was removed to the French line pier to sail on the "De Grasse" for the day aviator's native land.

BIG INDUSTRIES MAY LOCATE IN COAST PROVINCE

Yukon River Valley, Alaska, Is Being Developed

Vancouver, B.C.—Three major industries are making extensive investigations with the object of establishing in British Columbia, and one of them—one which would mean the building of a very large pulp mill, is almost certain to decide in favor of this province, according to Premier S. E. Talmie, who passed through Vancouver on route to Victoria after a visit to Eastern Canada.

The premier's visit to Ottawa concerned him that the International Sockeye Salmon Treaty will be passed at the present sitting of the Dominion Parliament providing amendments which may be made by the United States are satisfactory.

The premier said that the Dominion Government will investigate the Yukon section of the proposed Alaska Highway. Premier Talmie finds that British Columbia owes a debt to the members of the Australian lumber delegation whom he met in Ottawa. There is much evidence he said, of the thoroughness with which they did their job.

While in Ottawa the premier took up the matter of the five-year census for British Columbia. The premier expressed his opinion that he feels that British Columbia would benefit from the same provision. He promised to pursue the matter further.

One Day Old, but Lively

Every spring millions of baby chicks go out from the British Columbia coast and Vancouver Island to the interior of the province and the Prairie Provinces. Hatched earlier on the milder Pacific slope than elsewhere in the country, they are the cause of much trouble to poultry breeders in inland. Taken when they are but one day old, they are placed in cardboard boxes with breathing holes punched in them, and loaded into express cars kept at just the right temperature for their benefit. They can go 72 hours without food or water. Above package has just been landed at Vancouver, and is being examined prior to train shipment. According to officials of the Canadian Pacific Express company which annually handles millions of these fluffy balls, the traffic is growing steadily from year to year.

FRENCH MOTOR EXPERT

King May Appoint New Poet Laureate

London, Eng.—The literary and the ordinary public too are wondering who will be the next poet laureate, or if indeed there will be any successor to Dr. Robert Bridges. The question of whether his honorary position would lapse was raised after the death of Lord Tennyson, and Tennyson's successor, Austin, was not appointed until Tennyson had been dead four years.

Lord Tennyson, who died in 1852, was the last poet who actually performed in any measurable degree the direct duty of the poet laureate, namely, the writing of a poem or ode when the monarch was buried with anything of extra moment.

But it is likely that His Majesty will appoint a reasonable official, on the advice of the prime minister, for the title of poet laureate upon some scholarly man of verse and thereby continue this special royal recognition of poetry, which began as early as the days of Chaucer, who received an allowance of wine from the King's wine butts.

Noted Soldier Dead

Sir Gordon Guggisberg, Served Canada In Many Ways

London, Eng.—Few men have had a more versatile career or a greater variety of Empire service than Sir Gordon Guggisberg, noted soldier, colonial administrator, who died here came as a shock to official circles. Sir Gordon had been governor of British Guiana since 1928. He was 60 years of age and Canadian-born, his birthplace being Toronto.

Sir Gordon Guggisberg had an exhibition at the Victoria and Albert museum in London in the war and before and after that he served his country in the east, in Africa and in India. He was a member of the staff of the Royal Military College at Sandhurst, and his military promotion was for a long time a source of pride to Gordon Guggisberg, in this he suffered what was but the inevitable lot of most peace-time soldiers.

Canadian Prisons Fireproof

Ohio Disaster Could Not Happen Here Says Superintendent

Ottawa, Ont.—The fireproofness of Canadian prisons is a subject of considerable interest to the public. The superintendent of the Ontario penitentiaries here, when asked if he had any objection to the Canadian state institution with the loss of more than 200 lives could happen in any Canadian penitentiary.

"Our institutions," said General Hughes, "are entirely fireproof."

All the cell blocks in the Canadian penitentiaries were fire-proof, he said.

TREATY SIGNED BY DELEGATES OF FIVE POWERS

London, Eng.—The London naval treaty of 1929 was signed by the delegates of the five powers in the presence of the king and queen, the duke of York, the duke of Gloucester, and the duke of Kent.

The full text of the treaty was officially made public at the moment when Secretary of State (Herbert Asquith) read it out in the House of Commons. The treaty was signed by the five powers in the presence of the king and queen, the duke of York, the duke of Gloucester, and the duke of Kent.

The treaty was signed by the five powers in the presence of the king and queen, the duke of York, the duke of Gloucester, and the duke of Kent.

Quarantine Districts Selected

Ottawa, Ont.—Several rural municipalities in Saskatchewan have been chosen as quarantine districts for the eradication of bovine tuberculosis under the animal control act.

The districts selected are: The Prairie Provinces, which have been chosen as quarantine districts for the eradication of bovine tuberculosis under the animal control act.

The districts selected are: The Prairie Provinces, which have been chosen as quarantine districts for the eradication of bovine tuberculosis under the animal control act.

Will Inspect Airship

London, Eng.—Dr. Hugo Eckener, master of the Graf Zeppelin, who came to London after landing from the United States at Southampton, has been invited to visit the British Isles.

The Graf Zeppelin, which is the largest rigid airship in the world, is expected to visit the British Isles in the near future.

Service Starts May Third

Winnipeg, Commencing Saturday, May 3, a twice-a-week mixed freight and passenger train service will be inaugurated by the Hudson Bay Railway between The Pas and Churchill.

The train will carry only such passengers whose official duties make it necessary for them to proceed to Churchill. No accommodation will be available at Churchill for the housing of ordinary visitors, and the construction department of the railway, which will include construction of a new passenger terminal at Churchill, will not allow ordinary passengers to proceed beyond Mile 412 without a special permit.

Albans Risk Death To Reach States

Caught By Officers After Crossing Niagara River Above Rapids

Niagara Falls, N.Y.—Crossing the Niagara river in a frail boat, a short distance above the entrance to the rapids, a group of Albanians were caught by officers of the United States Customs Service in their attempt to reach the United States illegally.

The officers were caught by immigration border patrolmen after they searched the 200-foot bank of the gorge by means of an iron ladder that ran down a steep cliff, but the runner who had transported them escaped.

Trouble In India Is Becoming More Serious According To Reports

Service Starts May Third

Bombay, India. British authority is confronted with an increasingly grave situation in India. Serious rioting is going on with troops were reported in badly separated sections of the Empire as the anti-government movement spread. An Indian rebel army of 20,000 men was killed at Chittagong, after a fierce battle. Thousands of miles to the west.

At Peshawar, important outposts near the entrance to Khyber Pass, one or more British soldiers and 20 native soldiers were killed. Reports said, when a mob protested against the British government.

A Lahore dispatch, explaining the British action, stated that the British government had suppressed any idea that Gurkha troops posted machine-gun and rifle fire into the mob, which had held up an armed car, and were looting it, and it burned it. Both accounts were burned to death.

Caught By Officers After Crossing Niagara River Above Rapids

Niagara Falls, N.Y.—Crossing the Niagara river in a frail boat, a short distance above the entrance to the rapids, a group of Albanians were caught by officers of the United States Customs Service in their attempt to reach the United States illegally.

The officers were caught by immigration border patrolmen after they searched the 200-foot bank of the gorge by means of an iron ladder that ran down a steep cliff, but the runner who had transported them escaped.

Trouble In India Is Becoming More Serious According To Reports

Service Starts May Third

Bombay, India. British authority is confronted with an increasingly grave situation in India. Serious rioting is going on with troops were reported in badly separated sections of the Empire as the anti-government movement spread. An Indian rebel army of 20,000 men was killed at Chittagong, after a fierce battle. Thousands of miles to the west.

At Peshawar, important outposts near the entrance to Khyber Pass, one or more British soldiers and 20 native soldiers were killed. Reports said, when a mob protested against the British government.

A Lahore dispatch, explaining the British action, stated that the British government had suppressed any idea that Gurkha troops posted machine-gun and rifle fire into the mob, which had held up an armed car, and were looting it, and it burned it. Both accounts were burned to death.

(508)
"England is intensely interested in reciprocal trade possibilities with the Dominion. Although a satisfactory trade between England and Canada has been carried on in the past, an even greater interest is being shown by well-established firms in Great Britain in the 'Empire trade,'" said R. R. Galbraith, British expert of Saint John recently on landing from S.S. Duchess of Athol at Saint John. Galbraith is touring Canada in the interests of his firm.

"There is no feeling of resentment against the Canadian War Reliefs Fund in Great Britain," stated Sir. Hon. Lord Buxton, P.C., seventh son of the seventh Duke of Devonshire, on landing from S.S. Duchess of Athol at Saint John recently. "The consensus of opinion in the British Isles is becoming increasingly conscious of a serious economic problem which both British and Canadian farmers are called upon to face," he added.

Covering nearly 50 miles, leading into this agricultural territory in Saskatchewan, and Alberta, the Canadian Pacific Railway has just let contracts for grade construction by D. C. Colquhoun, Inc., Vancouver, in charge of western lines. These contracts cover less than half the railway's present grading programme.

We Know Him Well
"I'm kind of worried about that boy of mine," said Farmer Curious. "He's one of those young fellows that's too smart to take advice and not quite smart enough to think it up for themselves."

Plumber Pickin's
First Hubo: "I'm like the poet, I long for the wings of a dove."
Second Hubo: "Hub! Right now I'd rather have the breast of a chicken long with a couple of drumsticks."

SHOULD HAVE A CLEAN TOWN
No citizen likes to see rubbish lying about his premises, although some of us allow it to accumulate with the intention of having it removed later.

Rubbish creates unhealthful conditions, and is also a fire risk. Realizing this the town council request all citizens to clean up their premises. Tuesday, May 6 is the date set for clean-up day, and the council expects every resident to clean up the grounds about his home or place of business on or before this date.

SIGNS OF BATTLE
With the provincial election date set for June 19, the U.F.A., Liberal, and Conservative parties are mustering their forces for the election campaign which will probably open within a very short time.

The political pot is beginning to simmer in Bow Valley, but what the various parties are doing and who the various candidates will be has not been revealed. We do know that the U.F.A. will have a candidate in the field, and he will be nominated at the convention which the party will hold in Bassano some time during May.

Ben S. Plummer, of Bassano, is the logical man for the U.F.A. nomination, but it is doubtful if Mr. Plummer will accept the nomination, as he is a director of the Alberta Wheat Pool and actively engaged in pool work.

If Mr. Plummer refuses to run, there are two other names prominently mentioned as possible candidates for the U.F.A. These are W. R. Shandling, of Hazzard, and J. M. Whelan, of Chandler.

The Liberal will look for a new candidate, as Jas. T. Shaw, present member for Bow Valley, has declined he will not run here in the coming election.

The Conservatives will also require a new leader in Bow Valley. E. F. Purcell, who ran on the Conservative ticket at the last election, having moved to northern Manitoba.

REAL BROTHERS FOR GOLF

Whatever may be said of the mental and physical benefits to be derived from golf, it is a fact that the score of the average golf golfer (and this includes the most of us) is enough to give him the weepies.

After listening to the advice of well-meaning friends, and after following the daily golf hints published in the newspapers, and the going out on the course and flailing the same old bunker, the same old trap, and making the same fatal mistake, it is almost enough to make any golfer swear off the game for life.

Just how the idea is going to work out remains to be seen. Perhaps the golfer will really benefit by the useful notes of the golf birds. And the birds may get a kick out of the game themselves.

Personally, we are in the habit of playing on a prairie golf course where the squawky ding-dong of the golfer is distracting enough to disturb the melodic equilibrium of the most seasoned golfer.

Whatever effect the chirpings of the songbirds may have on his game, the resourceful golfer can always turn it to good advantage by blaming the singer whenever he suffers his shot.

CANADIAN CENSUS
Ottawa Preparations are under way for the decennial census of Canada to be taken in 1931, giving employment to 15,000 persons. The whole country will be covered by information seekers, getting statistics as to population, births, deaths, marriages, sex, nativity, age, and occupations. Production in all its forms, including mines, transportation, and finance, will be looked into.

Whether there are 36 Main headfags in census classification and 55 sub-section headings.

BEST-RESISTING WHEAT

Saskatoon, Sask.—Distribution of best resistant wheat to farmers within three or four years is foreseen in the official report of the recent conference held in Saskatoon of the committee on cereal rusts of the National Research Council. Several of the new wheat hybrids, says the report, have shown high rust resistance and satisfactory yield and quality in preliminary tests. These are now being subjected to severe tests at various points throughout the prairie provinces to ascertain their qualities on all important points including yield, quality, and strength of straw.

GLORY TO THEM

(by Anderson M. Scruggs)
Glory to them, the toilers of the earth
Who wrought with knotted hands in wood and stone,
Dreams their unlettered minds could not give birth
And symmetries their souls had never known.

Glory to them, the artisans who spread
Cathedrals like brown lace before the sun.
Who could not build a rhyme but reared instead
The Doric grandeur of the Parthenon!

I never dream a marble portico,
Or lift my eyes where stained glass windows steal
From virgin sunlight moods of deeper glow
Or walk dream-peopled streets, except to feel
A hush of reverence for that vast dead
Who gave us beauty for a crust of bread.

Letters to the Editor

Chancellor, April 28, '30

The Editor,
The Bassano Mail,
Dear Sir:

While reading your editorial in your issue of April 24 I noticed one under the caption of "Election Talk."

Now, sir, I cannot allow this to pass without a few words of reply, especially since the date of the election has been set for June 19.

With a portion of your article I am in accord, but with the part that refers to the U.F.A. as not being able to get all the farmer votes, I have this to say in reply—that the U.F.A. opposition cannot figure on all the votes in the "country" villages either, because there are quite a number of business men and others who realize that in the U.F.A. government we have the finest government that has ever ruled the province of Alberta.

With regard to the farmers who you say will not vote for U.F.A. on the 19th of June, I am willing to leave it to the intelligence of these men and women, and I venture to say that when the time comes you will find the farmers united to vote for their own good of the province, and the good of the prairie as a whole.

Now, sir, please allow me to thank you for the fairness you have shown toward the U.F.A. in the past, and trusting this attitude of fairness will produce space, and wishing the Bassano Mail every success, I am,

Yours truly,

J. M. WHEATLEY,
President Bow Valley U.F.A. Con. Association.

That wise man draws attention to the new most labeled shipping the Model of Honor won by Calgary Pilsener Beer.

The second wise man points to the label, a new design, commemorating Calgary's success at the world's exhibition.

You can't ignore the third wise man who proudly points to the Grand Prize—the symbol of the best Pilsener Beer in the world, and won by CALGARY!

Look at the bottle! It is a reproduction of the best three product label in the world. The label is a masterpiece of design and art. The label is a masterpiece of design and art. The label is a masterpiece of design and art.

Is Your Child Eligible for This Free Camera and Roll of Film?

Act Promptly!

There is no time to be lost. We have only a limited number of these gift cameras. If your girl or boy is eligible, come in at once to get the camera and film.

HOW OLD is your youngster? Has he become twelve years of age this year, or will he be before 1931? Any boy or girl whose twelfth birthday falls in any part of 1930 is eligible, right now, for a FREE camera and roll of Kodak Film. Our Kodak of Anniversary Kodak Co., Limited, to commemorate the Fiftieth Anniversary of Kodak.

Fifty thousand of these cameras and rolls of film are to be distributed in this country during the month of May, but only as long as the supply holds out. Our Kodak of Anniversary Camera is very limited, so if your youngster is eligible bring him or her in at once to get the camera and film.

There are no additional conditions to meet. No red tape. No delays. The only stipulation is that each child be accompanied by a parent or guardian. And our only advice is to act promptly, for these gift cameras will not last long.

STILES, "The Druggist"

ELECTION PROPHETS

SWING TO JULY DATE FOR APPEAL TO PUBLIC

OTTAWA, May 1.—The most recent evidence of government preparedness for an election comes from Washington. It is the news to the effect that in response to a request from the King government all proposed treaty agreements now lying in various stages are to be rushed along to a point where signatures may be affixed.

Only a few weeks ago Washington advised were to the effect that the senate foreign relations committee was studying the Canadian agreements then under way to compel acceptance by Canada of a definite arrangement for the St. Lawrence deepening scheme.

That attitude has been abandoned and it is announced that the "new treaty covering smuggling of prohibited goods, for which negotiations were opened by Premier King, just three weeks earlier, was ready for delivery at Ottawa. The treaty covering conservation of Niagara Falls, negotiated since last year in being rushed along, and the treaty covering sockeye salmon fishing in Puget Sound is being revised.

The latest news will be useful talking points to an election campaign the anti smuggling treaty in particular, as it gives Canada some thing in return for stopping export liquor clearances to the United States.

While it will take another two weeks to find a practical foundation for a policy as to an election campaign those who live on the fringe of politics are swinging to the viewpoint that July and not late August, or September will witness the polling of the vote. If the budget is to be the issue it will be rather dead heat, but fall, and there are many who believe that the election will take place in July, or not until next year.

Indications favor this year. Economic conditions are not of the best, but there is no guarantee they will not be worse before they are better. Premier King and his campaign manager, Senator Hayden, laid their plans during the recess at Bermuda. What they are, time alone will disclose.

ONE GOOD RECIPE MAKES A COOK FAMOUS

Art as well as science is needed to compose menus. Every day we read of the horrible things which are going to happen us if we are not more careful of our diet, every evening the radio man announces that we must not eat "pies, pastry, pork, and better leave off meats of all kinds. Rich soups, gravies, and dressings must be cut out, also cakes, cookies, white flour, white bread, white rice, candies, sweets, preserves, tea and coffee, fried foods, hashes, plum puddings" and it seems as if nearly everything else is banned.

So the trouble is to find dishes that are at one time appetizing, artistic, and dietetic. Here is a salad which should find favor.

Lemon, Pineapple, and Carrot Salad

Soak one tablespoon of granulated gelatin in one-fourth cupful of cold water; add one cupful of boiling water, half cupful of sugar, and stir until the sugar and gelatin are dissolved. When cool add half cupful of strained lemon juice, one cupful of grated pineapple, drained of all juice, one cupful of grated raw carrot, and a few grains of salt. Stir until the ingredients are evenly distributed, then pour the mixture into a large mold. The ice box is essential. Serve on lettuce leaves with any favorite dressing.

Local News

Next Tuesday, May 6, is clean-up day in Bassano.

Wm. Buchanan motored over from Heliak and spent Sunday in Bassano.

C. C. Wilson, of Heliak, was renewing acquaintances in Bassano on Wednesday.

Next Monday, May 5, is Arbor Day. The banks and the court office will be closed.

Mrs. Jas. Johnston and daughter Irene were in Calgary for a few days last week, returning on Sunday.

Mrs. Lindsay of Medicine Hat, visited last week at the home of her parents, Mr. and Mrs. S. Leonard. She returned to the Hat on Sunday.

T. H. Hunter and daughter, of Medicine Hat, were in town the latter part of last week. They returned home on Sunday.

Mrs. J. H. Brewer is visiting friends in Bassano this week. She expects to return to Calgary during the week-end.

Miss Norma Milroy, who has been raising in the domain of Hospital, Calgary, has completed her nursing course, and was graduated this week.

Ben S. Plummer is now in Ottawa in connection with the proposed revision of the grain act. He is representing the Alberta Wheat Producers at the conference.

Mrs. Hubert Chaillet and her daughter, of Chicago, are visiting for a few weeks at the home of Mrs. J. W. Bulmer. Mrs. Chaillet is a niece of the Mr. Bulmer.

E. Downes, chicken rancher, just south of town, has about eight hundred young chicks. He expects to increase the number to more than a thousand in a few days.

The people of Crowfoot are raising the value of trees on their farms. Last Tuesday several hundred trees were planted on the farms in that neighborhood.

Miss Eleanor Hefflinger was home for the Easter holidays. She is attending St. Mary's School in Calgary, and obtained 75 per cent in the Easter examinations.

Don't miss seeing "Nothing But the Truth" in the Masonic Community Hall Friday evening next week, May 5. This three act comedy will be presented by the Bassano Players.

Johnny Downes and his wife spent Easter in Bassano at the home of his parents, Mr. and Mrs. E. Downes. They returned to Lethbridge last Monday. Mr. Downes is employed on the Dominion government experimental farm there in connection with poultry work.

HOG PASTURES

(Experimental Farms Note)
At Indian Head such pasture crops as rape, oats, barley, fall rye, and various combination mixtures have been under test for some years.

A variety of pastures is essential in order to provide abundance of succulent feed throughout the season, especially for young growing pigs and brood sows. Shade, and plenty of fresh water are important factors to keep in mind for pigs on summer pasture.

Rape has proved to be one of the best pastures under test, from the standpoint of gain and yield of succulent pasture throughout the summer and fall. A good stand of rape pasture is capable of carrying from fifteen to twenty pigs per acre. If the season is damp with periodic spells of hot blistering sun the pigs are subject to sun scald.

Fall rye has also given good results as a hog pasture. It is possibly not as palatable as some of the other pastures, but it provides abundance of early feed for the spring litter. Oats and fall rye sown early in June is to be recommended. This mixture provides succulent feed throughout the entire season.

Fall rye sown alone in June also provides abundance of green feed for the fall litters.

Coarse grains such as oats, barley, etc., when sown alone or in combination supply abundance of green succulent feed. To obtain best results with these mixtures the pigs should be turned on when the growth is from six to eight inches high.

Annual crops are recommended on account of their value as pastures, and the seed is readily available.

Pastures provide abundance of cheap feed, reduce the feeding of concentrates, and especially are desirable for economical pork production with the heavier breeds.

Good Hunting
Wage: "Have any luck hunting lions in Africa?"
Tag: "Yes, I didn't meet one."

When Neptune Had His Pace Lifted
Freddy: "What is an iceberg, Daddy?"
Daddy: "Why, it's a kind of permanent wave, son."

Broward of Shivers
Chivers: "I take a cold shower every morning."
Williams: "Why brag about it?"
Chivers: "Gosh, that's why I take it."

BIG TIRE VALUE
for SMALL cars

WE'VE just received from Goodyear a big shipment of tires in Ford, Chevrolet and Whippet sizes. Come in and look them over. Whatever price you want to pay, we offer you a Goodyear-tired, Goodyear-quality tire at that price. All-Weather, All-Weather Heavy Duty, Pathfinder and Progress tires to choose from. Canada's highest tire value in each price class.

Bassano, Alta.

Well Staffed
The following notice appeared in an Ontario newspaper which devotes part of its space to matter in English: "The news of English we tell the latest. With in perfect style and most earliest. It is a murder count, we hear of it and tell it. Do a mighty chief die, we publish it and in borders sombre. Staff has each been colored, and write like Kipling and the Dickens. We circle every town and exultant not for advertisements."

WORLD HAPPENINGS BRIEFLY TOLD

No more British trainees will be placed on Ontario farms by the province. The government announced the experiment had not proved satisfactory.

Sergeant Major William J. Clement, George's oldest soldier, celebrated his 100th birthday April 25. He has spent a lifetime in the army, yet has never seen a single battle-day.

Robert Bridges, poet laureate of England, died in London April 21. Mr. Bridges, who has been poet laureate since 1913, was 86 years old. His works were known all over the world.

Official announcement has been made for rendition of Weihaiwei, a British base in Shantung, back to China. The agreement was signed by Sir Miles Lampson, British minister, and C. T. Wang, Chinese foreign minister.

Coming to the end of their long road, the delegates of the great five naval powers affixed their signatures to an historic treaty limiting and reducing the navies of three of them and placing certain restrictions upon the sea forces of the other two.

If the luck of certain Port Burwell, Ont., fishermen keeps up, housewives soon may be ordering goldfish from the fish shops. Fishing in Lake Erie, about a mile west of the harbor, the fishermen brought in a live goldfish, about eight inches in length, in their nets.

When Lord Hyng returns to England, he will apparently resume his duties as chief commissioner of Metropolitan Police and head of Scotland Yard. He has been staying with a friend near Port Elizabeth, S.A., recuperating from his serious illness of last December.

Banquet For Livestock Men

Old Timers Will Be Entertained At Calgary Exhibition.

One of the events of the 1930 Calgary Exhibition and Stampede will be the dinner to be given by the Canadian Pacific Railway on Tuesday, July 8th, to the men who were actively engaged in the livestock industry in the territory bounded by Moose Jaw on the east to Kamloops on the west, and from Red Deer River on the north to the international boundary, prior to December 31st, 1930. The guests must have been at least 20 years of age at that time and engaged in the ranching business either as owners, managers, foremen, cowpunchers, cooks or horse wranglers.

A Picturesque Ceremony

One of the most picturesque ceremonies held in Rome, Italy, this year, was on the feast of St. Agnes, when the blessing of the lambs was observed. White-veiled girls carried the garlanded animals from the fleece of which is woven the pallium worn by Roman archbishops through the streets in procession before the blessing.

Powerful New Gun

A new gun capable of firing 20 calibre bullets nine miles at a rate of 800 a minute has been accepted by the U.S. navy department and will be manufactured as one of the newest and most deadly offensive modern arms. The gun is the invention of Robert F. Hudson.

News For Horse Lovers

Statistics Show They Are Hard To Displace

That farmers all over the world realize the advantages of horses for agricultural work, is shown by the following figures, just published by the National Horse Association:

In 1788 the only horses in Australia were one stallion, three mares and a colt. In 1800 they had increased to 230; in 1850 to 150,051, and now there are 2,250,361.

In Great Britain there are 1,204,198 horses engaged in agriculture. Despite the enormous depletion of horses in France during the war, there are now 3,000,000 in that country.

Although millions of pounds have been spent in the United States trying to displace them, there are 20,000,000 horses and mules in the country.

Germany has 2,805,000 horses, excluding those attached to the Army.

Irrigation Project A Success

Value Of Production In Lethbridge Area Greatly Increased.

Farmers in the Lethbridge North Irrigation Project have very successfully increased their production in 1929, according to the report published in the Alberta Legislature by Hon. W. V. Smith, Minister of Lands and Forests. The value of production that year was \$2,477,000, or an increase of \$832,257 over the year before. The occupied part of the Project is growing each year and now represents about half of the whole.

YOUTHFUL CHARM

All Tinney models are created and sketched in Paris and the patterns are made in New York. Here's a darling frock for college girls and debutantes. It has a moulded bodice and softly flared skirt—a style adorable for slim young bodies. The collar and cuffs are charming too, easy to make and yet so fascinating when finished.

Flat silk crepe and wool crepe are lovely for this model, but another suitable and charming medium is marocain.

Imagine, for instance, soft green or scarlet marocain, with organdie ruffled with cream tinted valencienes to match.

Another extremely pretty way of making the collar and cuffs is to use organdie with ruffles of narrow matching ribbon. Sometimes this can be purchased with a tiny metal edge which makes a most attractive finish.

Of course a bought collar and cuff set can be worn with this model.

This pattern may be obtained in sizes 14 to 20 and 24 to 30. It is ready for immediate delivery. It is hand cut.

Pattern price 25 cents. Be sure to fit in size of pattern. Address: Pattern Department.

DON'T SUFFER WITH DANGEROUS INDIGESTION

Do you suffer after meals with a belching, from sour and acid stomach? Many believe they have heart trouble and tremble with fear, expecting any minute to drop dead. This condition can be prevented, however, relieved.

Take Carter's Little Liver Pills after meals and before bedtime. Sweeten the sour and acid stomach, relieve the gas and wind, and the bowels will be cleaned of poison, painful and dangerous indigestion disappears and the system enjoys a tonic effect. Don't delay. Ask your druggist for a 25c pkg. of Carter's Little Liver Pills.

Plan Announced For Zeppelin Ocean Service

Two American and Two German Dirigibles Will Be Used

Out of studies and conferences which have engaged Dr. Hugo Eckener day by day, there has emerged the latest details concerning trans-oceanic dirigible service which may be initiated within two years.

One of the Graf Zeppelin commander's closest assistants, Commander J. J. Hunsaker, revealed that passengers' fares will be approximately double steamer rates.

Germany will furnish two ships, the Graf Zeppelin and a new dirigible to be completed in 1931.

America will build two ships, modelled after the two dirigibles ordered by the United States navy.

Eastward trips will be made in two days and western trips in three days.

The Akron dock is at present building the ZHS-4 and the ZHS-5 for the United States navy. These ships, four-masted, of a new line of streamlined dirigible types, will be the basis in engineering experience for the airships for the projected Atlantic line.

The numerous types which are to be started at Akron immediately upon the completion of the navy ships will be several times larger than the Graf Zeppelin and larger even than the R-109, the British dirigible.

The basic, tentatively planned accommodation for 100 passengers. With this capacity, the total deck area of the ship, which will measure the frame of the dirigible, will be 12,000 square feet, of which each station will require an average of 4 more than seventy square feet.

Tentative plans call for two floor levels on these ships on the lower level, which will be situated at the lowest portion of the ship, will be kitchens, cabins, clubrooms, quarters for officers and crew. On the upper floor, or deck, will be state-rooms and promenades next to the outer walls. Each station will be for two persons and will be similar to Pullman.

Speaking Signal For Cars

Microphone For Use Of Driver Is French Invention

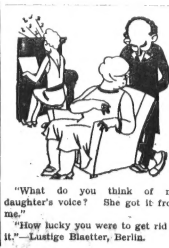

The automobile horn is too impersonal, so a French inventor has combined the theories of the loud speaker and the horn and has developed a speaking signal for motor cars.

Just in front of the driver is a microphone. As a pedestrian starts across his path, the driver, without raising his voice, says into the instrument "Look out please, you're in my way."

When he turns to the right or left he tells everyone of his intentions. If he wants to pass the car ahead, his magnified voice can drown the cut out of the other driver. It has unlimited possibilities for talking back to a traffic cop.

Building First Plane

The Dominion Air Industries Limited, which recently leased a site and factory with option of purchase in Medicine Hat, expects to start operations shortly on the building of its first airplane. The flying field will cover 265 acres.

"What do you think of my daughter's voice? She got it from me."

"How lucky you were to get rid of it."—Justice Blatter, Berlin.

Annuities For Judges

Legislation To Be Introduced At Present Session Of Federal Parliament

Legislation respecting annuities to Judges of the Supreme Court of Canada and the Exchequer Court, on reaching the age of 75 years is to be introduced at the present session of parliament.

A resolution placed on the order paper of the House of Commons by Hon. Ernest Lapointe, reads:

"That it be expected to amend the Judges' Act to provide that an annuity equal to his salary at the time he ceased or ceases to hold office may be granted to a judge of the Supreme Court of Canada or of the Exchequer Court of Canada who held office on March 31, 1927, and continued or continues in office until he attained or attains 75 years of age; and that an annuity equal to two-thirds of the salary annexed to the office which such judge holds at the time he so ceases to be a judge may be granted to a judge of the said courts, as pointed after March 31, 1927, attaining 75 years of age after service of 10 years, or aggregate service of 10 years in that office and as judge of a provincial superior court."

Recipes For This Week

(By Betty Barclay)

SPINACH SALAD

(Serves 6)

- 4 head lettuce
- 1 can green asparagus tips
- 2 fresh tomatoes
- 2 large oranges
- Pimento and mayonnaise.

Place one slice of tomato on each salad plate on which has been arranged a bed of lettuce. Pyramid 3 asparagus tips on tomato slice. Top off with mayonnaise and a strip of pimento. Arrange 4 sections of orange around the tomato.

ECONOMY MEAT PIE

Put leftover meat and vegetables into uniform, mini-sized pieces into an equal amount of medium cream sauce (1 cup milk, 2 tablespoons flour, 2 tablespoons butter). Season with onion, salt, pepper.

Put the left-over gravy with cream sauce (if possible) over with a thick pie crust, biscuit dough, or layer of left-over mashed potato mixed with milk (one slightly beaten egg can be added to potato if desired). Bake in a moderate oven until the crust is browned, or until browned and heated through if potato is used.

Old Time Printer Dead

Nova Scotia Man "Published Only Handset Daily In Canada"

Charles C. Blackader, veteran publisher and editor of the Acadia Recorder, the only handset daily paper on the continent, died recently at Halifax, after an illness of four months. He was 82 years old.

He maintained the Recorder, which had been in the possession of his family since 1835, in its original form of one large black sheet. He refused to install modern machinery, claiming it would throw too many old employees out of work. He read every copy of his paper every day and personally checked on the accuracy of the names and initials of every person mentioned in the columns.

Nova Scotia, a feature started by his father, religiously to the last. Before Confederation he opposed the union of the provinces and continued his opposition. Dominion Day was never a holiday for the Recorder's employees, but they celebrated June 21, the natal day of Halifax, instead.

He refused nominations for both local and federal Houses and also declined a senatorship in 1902, and the lieutenant-governorship of Nova Scotia.

Every morning of his life he rose at six o'clock, personally called for the mail at the post office at seven and went directly to his office.

Filleting Of Fish

Filleting of fish in the Peter Pond district, a couple of hundred miles north of the Battledore district, in Saskatchewan, was undertaken this winter for the first time, when 40,000 pounds of whitefish and 5,000 pounds of jackfish were filleted.

Where Ireland Lends

Reports of the Irish Free State, just published, show a greater percentage of spinsters of all ages than in any other country in the world. Between the ages of 30 and 35 at least 42 per cent of the women are unmarried.

A 20-inch snow represents only about two inches of water.

Determined By Owner

Milk Production Of Dairy Cow Depends On Pasture and Winter Feed

The average yield of milk per cow is computed statistically and the damaging figures are given to the world. There is, however, one encouraging feature about these cow averages, for in the lifetime of a generation our foster mothers do yield to the persuasive influence of publicity and propaganda and step up the average about 200 pounds.

Our cows are improving, gradually; there is no doubt about that, but as husbandmen, or dairymen are we making similar progress in the number of acres required to maintain a cow respectably for a year?

A dairy cow has absolutely no choice as to her parentage or sustenance. The average milk production is determined by the owner, not by the cow. The number of acres required for pasture and to produce winter feed is really worse than the average milk yield. And here again the owner or farmer is the deciding factor.

It is probably a conservative statement to make that a full grown cattle beast requires 3 acres for summer pasture alone, 1½ acres for hay and still another acre or two for grain, silage and roots. Roughly speaking, between 5 and 6 acres of good farm land are utilized in the maintenance of every cow or milking steer. It is good grazing, as pasture goes, when three acres will sustain an animal for the summer season. On some of the best grazing land in Ontario only 25 head are turned on to 100 acres.

Through improved methods of grassland management, pastures in the Old Country have been made to maintain one head per acre. In Canada we cannot expect to equal the grazing possibilities of English meadows, but our pastures can be enormously improved through fertilization and better management.

Considering rental values, inconvenience incident to water supply and pasturing live stock away from home, it would appear that \$5 to \$10 per acre improvement, and still have a better profit for the owner. An annual expense of this amount has not been experienced in Canada and United States, and the results have been highly satisfactory.

An average healthy man should be able to lift two and one-half times his own weight.

Grand Falls, in Labrador, is said to be the highest waterfall in the world. It is 2,008 feet high.

Establishing Training Centres For Criminals

English Prison Commission Plans To Train Men In Suitable Work

As part of the scheme to reclaim young criminals, the English prison commission will establish a series of training centres, the first of which will be at Nottingham, where men will be trained each man in the work for which he is best suited.

The men will work eight hours a day. Speaking of the scheme, an official of the prison commission said in an interview: "Probably we shall attach some of the men to the building parties and engineers. There will be physical training, and in the evening educational pursuits."

Further the official said: "Criminals will not be sent to the training centre direct by order of the courts, but will graduate from the prison to the training centre."

Sowing Sweet Clover

The Co-operative Creamery of Cardston, Alberta, announces the rearing of orders and sales of sweet clover seed in Cardston, to surrounding farmers totalling over 10,000 pounds. This is in response to its spring among the farmers asking them to sow sweet clover seed this spring in the interests of an improving dairy and livestock business.

CHAPTER X—Continued.

"Wonder who wove you," she mused dreamily. "You must have seemed almost a part of him as the weeks passed and he saw your loveliness unfold. Did he dread the finishing of his task, I wonder, knowing that at its end he must give you up forever? And did he know that when it was only a memory, his own, that he would live, cherished by some one thousands of miles from his own birthplace?"

"The stopped, to brush a hand over the silky surface.

"I think you were woven on an old loom," she murmured. "You were, perhaps, the only beautiful thing in some humble room. I think that little children watched you grow, and touched you with small reverent fingers. I think you were woven on an old loom."

Charman stiffened, suddenly conscious that a shadow was lying across the rich wine color of the old rug, and the blood flew to her cheeks as she saw Jim Bennett in the doorway. She sprang up, laughing, in her confusion.

"How long have you been there, listening to me go on like that?" she asked.

Jim grinned.

"Not long enough to be called an intentional eavesdropper; but long enough to wonder

"Wonder what?" urged Charman as he paused.

"If you'd gone dotting making such passionate love to an inanimate object it is something new."

"New?" echoed Charman in amazement. "Can't you see with a single glance that it's ages old? Oh, Jim! wouldn't it be wonderful to find a thing like this? Why, just to walk on it seems a 'prodigious'."

"In that case," commented Jim, seating himself on a corner of the doctor's desk, "I don't know who 'Home Sweet Home' would be without a comfortable retreat. If a feller got hollered to step on a rug that was in the way, you'd say it was a nuisance, wouldn't you?"

"The air would be liable to become

charged with something related to profanation!"

Charman laughed. Then her eyes grew troubled, and she questioned, "But you like it, don't you, Jim? You see its beauty?"

The young man, sensing that this question was a serious matter to the girl, looked down at the rug thoughtfully, then up at the window hangings—

at the candlesticks upon the mantel, and at last came back to the anxious eyes of his old playmate.

"Yes, I like it, Charman; but I was wondering if what pleased me was only a habit of thought."

"It looks like you, somehow—this room. I mean, that's why I like it, I suppose," he added honestly. "If you were a habit of thought, it would be the same as me."

"I think it was all right because you said so. In some ways, Charman, I'm a damn fool."

The girl laughed, though she was secretly touched, and asked: "What brings you out this hour of the morning?"

"A trip over beyond South West, to see about a mortgage for the bank. Thought you might go with me. It's a badly day."

"I'll go with you, Jim," she said, with a second-long gleam of the open door, "but I've just refused to go with the two M.D.'s because of an extra lot of duties."

"Let me wait a day longer. If I could cut out one of those M.D.'s I'd see a ray of light in the surrounding gloom."

"Better take your mother," suggested Charman, making an unsuccessful effort to suppress a smile.

"She can't go, I—"

"So, for all I care! Just wait till I tell Grandma, and—"

Jim laughed, a cheeky, choky little laugh that she knew came hard.

"Don't be so afraid," he said. "You haven't hurt me, Charman; and I won't have you going just for that reason. Honestly, I don't want you to go now. I've got things to mull over in my mind, and you're a disturbing influence. Run along and get your work done. I'm all right."

"But I'm not," smiled the girl. She was gently propelling him out of the doctor's office, toward the house.

"I feel the need of air and sunshine, and it's your duty to see that I get both. You talk with Grandma while I set the dinner table so I won't be so hurried to get back."

She was away, leaving him standing at the door of the old parlor where Grandma Davis was keeping her accustomed vigil.

"Hello, sonny," she greeted him. "What you doing, sonny? From the bank this time of day?"

"Running down some interest money," explained Jim. "I've promised old Charman that it's too good a day to waste indoors."

"So he," agreed the old lady, "and a right do he see a lot of good. I'm hoping maybe she'll get out more often than Doctor Carter gets her car's ordered. It'll be real natural for him to take her when he rides off in the country, won't it?"

"Too darn natural," replied Jim; then, to change the subject, "What's been happening on Broadway this morning, Grandma?"

"You mean Man's World? Well, I'll admit I've seen things more lively than they've been today, but Lizzie Baker lost her sweater pocketbook on the sidewalk, and she went out of it and scurry home."

"That's worth considering to see that," "Gosh! I'll say it was!"

Jim laughed so heartily that Charman, setting the table in the room beyond, breathed a sigh of relief.

"What's happened?" "It is so funny."

"It wasn't funny for Lizzie Baker," replied Charman. "You leave that alone. You're late back. The doctor can set it himself, and you mustn't keep him waiting. There's nothing irritates a man like being kept waiting."

"The tables set, and I won't keep him waiting a minute longer. Ready, Jim?"

He nodded, rising slowly as if reluctant to take his eyes from the picture the girl gave as she walked with the dinky ball as a background for her blue gown.

"A pink scarf across her arm, added a splash of color to her blue gown, and if the young man had been slow to appreciate the beauty of an ornate rug, he was certainly not slow to appreciate the form of his old playmate."

"Where's your hat?" asked Grandma. "You're not going back to South West with that?"

Charman laughed.

"I must surely am! After the gorgeous greenness that Jim's accustomed to, this is a real treat."

"Shucks!" blurted in Grandma. "Your old black straw with the pink ends is enough right pretty than this."

That, Charman thought, was the worst that could be said.

Words failed her, and the two young people laughed as Jim responded.

"Don't worry, Grandma. She doesn't need a hat, and with all that 'woman's crowning glory' to keep off the draughts, come on, Charman, and let me break the speed lines."

"I get you back in time to cook dinner for your brother?"

"Don't you say any reckless thing," warned Grandma as she moved away. "I'm not so foolish that I can't stand before you if you're late and get that mail order catalogue I want to return to you."

(To Be Continued.)

idea is alright

But People Should Build Foundation Under Air Castles

If your work need not be that; that is where they should be. Now put the 'peeps under them,' said Henry Davis, the Hellen Keller says we cannot always realize our ideals, but we can always realize our results, and our ideas must be practical.

He said that to make a religion of them and live by them. Phillips Brooks expressed a high ideal in these words: "The greatest life is the pettiness of our daily living. We should exalt our living to the grandeur of life."

OVER 17 MILLION DRS USED YEARLY

Bad Year For Icebergs

But Ice Patrol Has Reduced Danger To Minimum

This year promises to be exceptional for icebergs in the Atlantic. Bergs were reported off the Grand Banks as early as the third week in January, when the Ice Patrol was still in winter quarters.

If this promise is fulfilled it will be another link in the chain of evidence which supports the theory of a nine-year cycle.

It was observed that in 1903 bergs were very numerous. In 1912 the Titanic sank, and lived to tell their doom owing to the unusual quantity of ice in the Atlantic. In 1921 heavy ice appeared early in the Grand Banks, and bergs were observed as late as August.

But even if 1930 does produce large quantities of ice, the danger to shipping is not likely to be any greater. Since the formation of the Ice Patrol not a life has been lost as a result of a ship collision.

After the Titanic disaster, when the great ship split her keel on an iceberg and sank with 1,000 people, the maritime nations agreed in conference to finance an ice patrol. America provides three coastguard cutters for the work.

The expense of their upkeep is met by the nations using the Atlantic shipping routes, and the American navy contributes to the tonnage operated.

Great Britain is the largest single contributor, her share of the total expense being 20 per cent.

The three cutters engaged relieve each other at 15-day intervals. Each week they make a circuit for duty, leaving winter quarters in Britain and proceed to the Grand Banks of Newfoundland. If no ice is found they return the cutter proceeds northward.

Individual Traffic Cops

Pick Trucks on Paris Street

By Jean Chappie, head of the Paris police department plans to make every Paris policeman his own traffic cop.

An ingenious signal has just been installed at one of the busy corners in Paris where a person wishing to cross the street can press a button and halt all the automobile traffic.

The buttons are placed on either side of the street on the electric lamp posts. By merely giving a button press a red signal is flashed from a traffic light forcing all motorists to stop.

The signal remains lighted 15 seconds in which the policeman must survey across the street.

In order that no pedestrians will not keep the red signal up all the time, the police have regulated the instrument so that it will not flash red for at least 5 seconds after it is extinguished. If this apparatus proves successful, the police hope to install the instruments on all corners where no regular traffic officers are stationed.

Campers Carry Minard's

Using Automatic Pilots

British 'Flanes Make Long Flights With Robot Control

The entire squadron of British night bombers, equipped with "robot" electrical controls, has flown continuously as far as 400 miles without human pilot, taking charge from the cockpit.

Land has been followed, with automatic pilots, actuated by radio from the ground, in complete charges, and the aeroplane brought safely to a predetermined destination. The automatic landing is accomplished by means of a "weighty" machine, which soon as it comes in contact with the aerodrome, causes the aeroplane to drop and glide in with the engine throttle back.

Customers Are Scattered

Time and Weather Are Broadest

From Kibler Tower

When you set your watch by ship's time at the Atlantic Ocean you are taking the say-so of the Kibler Tower like an ass.

The world's tallest timekeeper measures 984 feet from the ground to the crown's nest which furnishes time and weather reports to ships at sea.

Up in the tiny tower room, frequently hidden from Paris by clouds and mist, crews of busy men operate the radio sending apparatus. Their neighbors are experts of the meteorological bureau which is equipped with powerful barometers, aneroidometers and pluviometers.

The weather men live in a world of their own. Their pals are other weather observers at faraway points to the north, the east, and the south. Their customers are the ships at sea and agencies which need to know today what the weather will be tomorrow.

Ground level below lies Paris, almost as remote from their daily lives as London across the Channel. They can reach the foot of the tower by fifteen minutes' descent by foot and elevator. They can telephone London as quickly as they can talk Paris.

If they want something to eat or drink the tower restaurant is five hundred feet below, halfway between earth and their perch in the sky.

Gustave Eiffel, whose name is pronounced in French like the letter P, said to live in one of the top-most apartments in the tower. He built it was a bridge builder by profession.

He died in the tower, and his body was buried in the tower. He died in the tower, and his body was buried in the tower.

Where Fate Steps In

People Who Came Through Scissors

Danger Caught By Single Accidents

Not long ago William F. Scott, survivor of more than 200 parachute jumps, said to be the champion of the navy at this form of sport, received a fractured skull and other serious injuries near Washington.

In a parachute jump, Scott fell at an ordinary automobile accident. This time more as he saw the sorry truck of a car, he saw the sorry truck of a car, he saw the sorry truck of a car.

Where Children Broadcast

Alberta Red Cross Gives Interesting Program Every Week

In a city broadcasting station in the capital city of Alberta, there has been an unusual broadcast, in which the artists were quite young children.

C.I.A.A. The Journal, Edmonton, has for many years kindly donated its station to the Alberta Red Cross for one hour weekly. This period has been popular with the country people, especially with groups of women's service clubs, such as the Women's Institute and the U.P.W.A.

Programs consist of health talks, Red Cross news, dramatic sketches, etc. By special permission the program was turned over for an afternoon to a Junior Red Cross branch of Grade Six pupils from Norwood school.

These young people gave an interesting feature in the presentation of a regular monthly meeting, with the young president in the chair, and the usual procedure of business etc.

The entertainment period included a musical number, a recitation, and a play. The play was a beautiful one, and the British Juniors to Canadian Juniors during a visit to England of Miss Ann Brown, the National Director of Junior Red Cross in Canada. The clear young voices of the Juniors rang over the ether with splendid power, and the unusual beauty of these twenty young Albertans was listened to with much interest by the many friends of the air.

Little Help For This Week

"Giving thanks always for all things." Ephesians 5, 20

Blessed it is believing not in the future, but in the present. What is it? It is what we have now.

God will be best for man, whose will is better than his own. God's will is better to us, yes, than his own.

Twelve, where He holds and weighs the key. He knows all want, allots each where and when—

Christina G. Rossetti.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.

Thou alone knowest what is good for me. Thou alone knowest what is good for me. Thou alone knowest what is good for me.
